

Brazilian E-Commerce Public by Olist

Agenda

Introduction
Import Data
Transformation Stage
Data Modeling
Visualization

Introduction

- The dataset has information of 100k orders from 2016 to 2018 made at multiple marketplaces in Brazil. Its features allows viewing an order from multiple dimensions: from order status, price, payment and freight performance to customer location, product attributes and finally reviews written by customers. We also released a geolocation dataset that relates Brazilian zip codes to lat/lng coordinates.

Import Data

Make a Parameter to Put The File Path of the Data

The image shows a configuration window titled "Folder Path" with a close button (X) in the top right corner. The window is divided into two main sections. The left section is a list box, currently empty. The right section contains the following fields and controls:

- Folder Path**: A text input field at the top.
- Description**: A larger text input field below the main title.
- Required**: A checkbox with a green checkmark, labeled "Required".
- Type**: A dropdown menu currently showing "Text".
- Suggested Values**: A dropdown menu currently showing "Any value".
- Current Value**: A text input field at the bottom containing the path "D:\Mentorness\Brazilian E-Commerce Public Dataset by O".

Import All Files from The Source of the Parameters

Visualization

Creating Measures

Sales Performance

- sales performance dashboard involves gathering and presenting key metrics and KPIs related to sales activities and outcomes

Orders Management

- An orders management dashboard is crucial for monitoring and optimizing the order fulfillment process

Customers Report

- A customer report dashboard provides valuable insights into customer behavior, preferences, and interactions with the business

Sellers Report

- A seller's report dashboard is essential for monitoring the performance of individual sellers or sales teams within the organization

Product Sales

- A product sales report dashboard is crucial for tracking the performance of products or services offered by The business

Deals Report

- A deals report dashboard is essential for tracking and managing sales opportunities or deals in the pipeline

Summery

the Olist dataset provides a valuable resource for studying various aspects of e-commerce operations and consumer behavior in the Brazilian market, making it a valuable asset for researchers, analysts, and businesses in the e-commerce industry.
